Profile

Highly motivated and result-oriented individual with a passion for implementing and launching new projects. Seeking a Web Developer position with a reputed firm driven by technology and innovation. Committed to leveraging my skills and expertise to contribute to the success of the organization and further advance my career in web development.

Employment History

Associate Software Developer, NextBridge IT Solutions, Pune

AUGUST 2022 – PRESENT

As an Associate software developer, my role included developing Custom widgets and Web applications which leads to customer satisfaction.

- Designing intuitive graphical user interface using HTML, CSS and JavaScript and React.js
- Working with Java and Node Js for server side programming.
- Working with DevOps tools like GIT.
- Creating middle-ware using JAVA to interact with widgets for advance functionalities and deployment in tomcat server under client side environment

Projects

SBCE-CDR Dashboard

FEBRUARY 2023 – MAY 2023

Our web application is designed to provide a comprehensive solution for managing and analyzing data. It consists of multiple components, including the Admin Dashboard, Historical Reports, and Register User. The Admin Dashboard, accessible only to administrators and supervisors, offers a visually appealing graphical dashboard created using React and Material UI framework. This dashboard provides a holistic view of key metrics and data. Additionally, the Historical Reports component presents a detailed table view of past data, allowing users to analyze trends and make informed decisions. With these features, our web application empowers administrators and supervisors to efficiently manage and visualize data for enhanced decision-making.

Three level work codes

OCTOBER 2022 – JANUARY 2023

It is custom widget in Avaya Workspace – When a Call/Email/Chat is answered by an agent, custom widget will appear. In widget agent can select the language(English or Arabic)based on the language selected the menu options will appear and displayed to the user.

The agent can then select the reasons form the list and can also write custom notes. The agent selected reasons and the interaction details of the customer are then get stored into database.

And in the another section Agent is able to see the details of current customer and his history which beging fetched from database if he has.

Lab Management

AUGUST 2022 – SEPTEMBER 2022

We successfully developed an internal proprietary software solution aimed at streamlining various administrative processes within our organization. This software efficiently manages internal lab requests, as well as the licensing and approval of access for all employees. With this system in place, we have created a centralized platform that simplifies and automates these crucial tasks, reducing manual efforts

and increasing operational efficiency. The software ensures seamless coordination and transparency, enabling timely processing of requests and accurate tracking of employee access permissions. Our proprietary software has greatly enhanced internal management processes, resulting in improved productivity and streamlined operations.

Task Locator

SEPTEMBER 2021 – MARCH 2022

Our system is responsible for notifying or reminding us the things of our needs based on areas in which we are present. The functionality of our system is that the GPS Tracker will continuously keep track of the user's current location and it will provide reminders to user for that location. In this way it will help to reduce different kinds of efforts to maintain the notes.
